

INCISION & DRAINAGE WOUND CARE

After your procedure wound care instructions

1. Leave the area covered and bandaged for 24 hours
2. Begin to gently pull the packing strip out _____ and cut the excess with scissors
3. Clean the area with vinegar water soaks (after 24 hours)

Mix together:

1 teaspoon white vinegar

1 pint warm water

Soak the washcloth in the above mixture and apply to the affected area for 20 minutes twice daily.

4. Apply Polysporin or Vaseline to the site and continue wound care until the packing is fully removed and the wound is healed.
